

Key Issues/Messages:

- At over 8.5m people, the South East has the largest population in England, and is projected to grow by 1.3m over the next 20 years.
- At least 50% increase is expected in the number of older people in the South East over the next 20 years, well above national average.
- The South East has also seen a relative increase in the number of people living in deprived areas between 2007-2010 compared to other parts of England. We have 565,000 people in areas classified in the 20% most deprived in the country.
- *Continued investment and action is needed to address both the challenges of population change and long-term areas of deprivation.*

Index of Multiple Deprivation 2010 - Population in 20% most deprived areas nationally

Index of Multiple Deprivation Change in Average IMD Score 2007-2010 (+ % = getting worse; - % = improving)

More detailed information, including local authority breakdown where available*, is on SEEC Data Dashboard (Dec. 2011) sheets:

- D1. Population Projections
- D2. Index of Multiple Deprivation.

SEEC's full Data Dashboard includes 6 themes, available at www.secouncils.gov.uk:

- A. Economy & Employment
- B. Housing & Infrastructure
- C. Public Finance & Grants
- D. Demography
- E. Migration
- F. Environment
